

# WEINIG CASING AND BASE PATTERNS

Templates for all the casing and base patterns shown in this book are available through Weinig Custom Grinding Service.

In addition to these stock templates, Weinig Custom Grinding Service also will make custom-profile templates specifically for your needs. Each computer-generated template is made using the Michael Weinig Axial Constant System. We also offer the option of producing a hardened steel template.

Casing and base patterns are grouped together in this section. However, since some patterns can be used in a variety of ways, reference should also be made to chair rails, found in the section on Rail Moulding Patterns on page 3005. In the section on Casing and Base Patterns, refer also to fluted casings, which come with beads, coves, or both beads and coves.

## CASING AND BASE PATTERNS

Example:   CB 150 43 01

- CB   Identifies the product as a Michael Weinig Casing/Base Profile Pattern
- 150   Width of the profile as first 3 decimals. Many of the base patterns can be stretched or modified to alter the width. Often the same template can be used to run a variety of widths.
- 43    Thickness as first 2 decimals.
- 01    Profile number

Select the width of your Casing and Base Pattern from one of the following:

UP TO 2.5"

FROM 3.562" TO 4.25"

FROM 2.562" TO 3.25"

FROM 4.25" TO 4.875"

FROM 3.312" TO 3.5"

FROM 5" TO 5.5"

FROM 5.5" TO 9"

FLUTED CASINGS
